

CRaTE Kennel Instructions for Locking Pin

Locking Pin Use

- Make sure the door is closed with all four pins fully extended.
- Locate the holes on either side of the kennel doorway
- Feed the rounded end of the pin through either side of the doorway, through the latch boxes, and through the opposite side of the doorway.
- Once the pin is fully inserted, the loop will line up with a similar size loop on the door to accept a lock.
- Ensure both the door and pin loops are captured by the lock.
